WIRELESS DOOR LOCK REMOTE CONTROL SYSTEM

■DESCRIPTION

The wireless door lock remote control system has been provided as optional equipment.
This system is a convenient system for locking and unlocking all doors at a distance. This system in the '06 models has the following features:

- In this system, the wireless door lock receiver performs the code identification process and sends the lock or unlock signal to the main body ECU, then the main body ECU effects the door lock control.
- A key-integrated, three-button (lock, unlock, panic) type transmitter is used.
- The hazard warning light is flashed once when locking, and the hazard warning light is flashed twice when unlocking, to inform that the operation has been completed.
- A panic alarm operation is provided that activates alarms when the panic button on the transmitter is pressed and held for approximately 0.8 seconds.
