

Strength in style.

Every line and curve of its body design plays upon the theme of energy and muscularity: from the wide front grille to the S-shaped door panels. Designed by Toyota to flow into movement, Yaris will thrill you with its superior maneuverability and lively handling. The placement of the tires at the four extremes of the body, work to enhance the overall stability and control of the 2008 Yaris.

Mission Control.

Yaris expands your sense of interior space – and legroom – with the help of a central instrument panel finished in silver with green lighting. Explore available sound options with everything from the AM/FM CD with 2- or 4-speakers right up to the AM/FM CD/MP3 6-disc changer with 4-speakers.

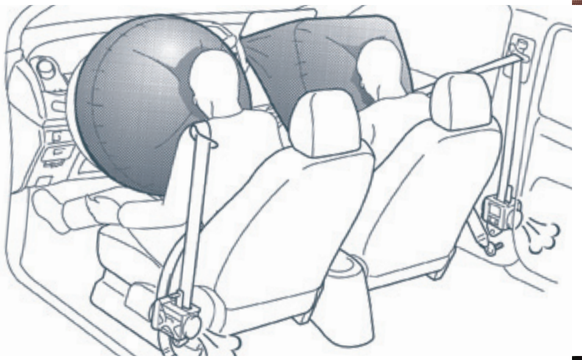

Above: Yaris 5-door LE shown in Bayou Blue Metallic.
Left top: Yaris 3-door CE shown in Blazing Blue Metallic.
Left below: Yaris LE and CE interior features.

Space to move.

The backseat of the Yaris RS tumbles and folds out of the way to give you a uniform flat surface – not to mention .738 cubic metres (26 cubic feet) of storage capacity. That's enough room to carry everything from skateboards and knapsacks to groceries and gardening gear.

Safe & sound.

Security from every angle. Yaris's body is built to absorb shock and disperse energy to minimize the force of impact. Combine this with a highly rigid cabin forged from high-strength steel and it is clear that Yaris protects you. Inside the cabin, Yaris further steps up the safety for drivers and passengers alike with a standard dual-stage Supplemental Restraint System (SRS) Airbag System and useful innovations like front seats that can help to reduce whiplash effect in low-speed collisions.

Power player.

The Yaris 1NZ-FE Engine. Expect years of brilliant and reliable performance from Yaris – powered by a 1.5 Litre, 4-cylinder in-line, 16-valve, 1NZ-FE engine. Utilizing the latest engineering technologies, the Yaris engine enjoys the winning combination of Variable Valve Timing with intelligence (VVT-i), Direct Ignition System (DIS) and Electronic Throttle Control System with intelligence (ETCS-i) to deliver improved fuel economy, higher performance, quietness and cleaner emissions.
